

Amendment to the Claims

This listing of claims will replace all prior versions and listings of claims in the application:

Listing of Claims

1. (currently amended): A dry cleaning process for in-home dry cleaning comprising a non-aqueous dry cleaning step of contacting a laundry article with a non-aqueous dry cleaning composition whereby the liquor to cloth ratio (w/w) (LCR) is at most 20, and said composition comprises:
 - a) a non-flammable, non-chlorine containing organic dry cleaning solvent;
 - b) from 0 to 0.1 wt.% water by weight of the composition; and
 - c) less than 0.9 wt.% of a surfactant wherein said surfactant comprises at least one anionic headgroup[. . .];
wherein the process further comprises a low aqueous dry cleaning step of contacting laundry articles with a low aqueous dry cleaning composition and wherein said low aqueous dry cleaning composition comprises:
 - a) a non-flammable, non-chlorine containing organic dry cleaning solvent;
 - b) from 0.01 to 10 wt.% water; and
 - c) from 0.001 to 10 wt.% of a surfactant by wt. of the total dry cleaning composition
2. (original): A dry cleaning process for in-home dry cleaning according to claim 1 wherein the surfactant is an acid.

3. (previously presented): A dry cleaning process for in-home dry cleaning according to claim 1 whereby said liquid to cloth ratio (w/w) is at most 10.
4. cancelled.
5. (currently amended): Cleaning process for in-home dry cleaning according to ~~claim 4~~ claim 1 wherein the low aqueous dry cleaning composition comprises ~~from 0.001 to 10 wt.%, preferably from 0.05 to 0.9 wt.% of surfactant by weight of the total dry cleaning composition.~~
6. (currently amended): A dry cleaning process for in-home dry cleaning according to ~~claim 4~~ claim 1 whereby the water to cloth ratio (w/w) during the low aqueous dry cleaning step is less than 0.45, ~~preferably less than 0.2.~~
7. (currently amended): A dry cleaning process for in-home dry cleaning according to ~~claim 4~~ claim 1 wherein the non-aqueous dry cleaning step precedes the low-aqueous dry cleaning step.

8. (previously presented): A dry cleaning process according to claim 1 wherein the non-flammable, non-chlorine containing organic dry cleaning solvent is selected from the group consisting of the isomers of nonafluoromethoxybutane, nonafluoroethoxybutane and decafluoropentane, octamethyl cyclotetrasiloxane, decamethyl cyclopentasiloxane, decamethyl tetrasiloxane, dodecamethyl pentasiloxane and mixtures thereof.
9. (previously presented): A dry cleaning process for in-home dry cleaning according to claim 1 whereby the surfactant to cloth ratio (w/w) is at most 0.25.
10. (previously presented): A dry cleaning process for in-home dry cleaning according to claim 1 whereby the laundry article is coloured.
